## Profile

I have developed a diverse skill set shaped by overcoming challenging circumstances in my upbringing. Growing up in less fortunate conditions taught me to be resourceful—crafting what I needed or repairing broken items. This experience sparked a deep passion and knowledge in Information Technology. I take great pride in my IT skills, especially programming and game development, which I truly enjoy. My dream is to work in a role focused on computers and problem-solving. Although my Dutch is reasonably good, I am still working to improve it to confidently excel in job interviews. I am eager to contribute my skills to your company and committed to enhancing my Dutch proficiency to meet your expectations. I hope you will consider me a valuable candidate for your team.
